PROFESSIONAL SUMMARY

GTM Engineer & Revenue Operations specialist with hands-on experience building data pipelines, workflow automations, and CRM integrations for B2B SaaS. Currently architecting GTM infrastructure at Deepki (Paris) automating lead enrichment, outbound sequencing, and revenue reporting using Google Apps Script, n8n, Salesforce, and HubSpot. Proven ability to ship tools that directly impact pipeline generation and sales velocity.

PROFESSIONAL EXPERIENCE

Revenue Operations Specialist (CDD) – Deepki – ESG SaaS

Aug 2025 – Present | Paris, France

- Built a company news monitoring system in Google Apps Script tracking 471 accounts via RSS with chained triggers, enabling real-time sales alerts without third-party tools.
- Engineered a LinkedIn contact enrichment pipeline using Apify and Google Apps Script with a 4-level fallback query system, automating prospecting data at scale.
- Saved 10+ hours/week designing n8n automation workflows integrating REST APIs and webhooks across HubSpot, Salesforce, and Google Workspace.
- Boosted forecasting accuracy by 15% and surfaced a 45% regional growth disparity — directly restructuring QBRs for a €6M revenue region.
- Ran win-ratio, win/loss, ROAS, ROI, and CAC analyses on field marketing events, contributing to a 40% increase in lead generation.
- Administered HubSpot and Salesforce as Super Admin — configuring objects, fields, permissions and workflows, improving CRM data accuracy by 21%.
- Deployed AI agents using Claude and Gemini APIs for intelligent workflow orchestration via n8n and Zapier.
- Designed a weekly pipeline PowerPoint automation using pptxgenjs from Salesforce exports, eliminating 3 hours of manual slide-building per week.
- Built a Salesforce Flow-based WbD Relationship Map automation to track stakeholder engagement across key accounts, improving account visibility for AEs.
- Created a Gong conversion rate dashboard covering win rates, funnel metrics, and conversation intelligence signals to support sales coaching decisions.

Sales & Growth Intern – Growth Student – EdTech

May 2024 – Sep 2024 | Nice, France

- Built and managed a B2B pipeline of 150+ potential clients, aligning weekly KPI reporting with growth forecasts.
- Collaborated with the CEO to refine ICP and pitch strategy, resulting in a 30% uplift in prospect response rates.
- Mapped full sales funnel from outreach to close, identifying drop-off stages and proposing sequence adjustments that reduced average sales cycle by 2 weeks.

TECHNICAL PROJECTS

LinkedIn Contact Enrichment Pipeline [Apify · Google Apps Script · REST API]

Automated LinkedIn prospecting for 470+ target accounts using a 4-level fallback query system, writing enriched contact data directly into Google Sheets for sales consumption.

Company News Monitoring System (NewsMonitor.gs) [Google Apps Script · RSS · HubSpot API]

Automated news tracker monitoring 471 companies via RSS with chained triggers, surfacing real-time buying signals to sales reps with no third-party tools.

Automated Lead-to-Demo Pipeline [HubSpot · Salesforce · Make · Google Apps Script]

End-to-end pipeline routing inbound leads from form fill to booked demo — including lead scoring, CRM routing logic, sequence enrollment, and Slack alerting.

EDUCATION

Masters in management & MSc Strategy and Consulting – EDHEC Business School, Lille

Sep 2022 – May 2025

- 1 of 2 recipients of the French Government merit scholarship. A+ in Operations Management, Financial Modelling & M&A.

B.Eng Fashion Technology – National Institute of Fashion Technology, Chennai

May 2021

- GPA: 9.4/10. Hands-on production experience with The North Face and PVH (Calvin Klein, Tommy Hilfiger).
